California fescue

Festuca californica

Photographer: Patricia Sesser

Plant Type:	Grass	Evergreen
Flower Color:	Whitish yellow	
Flowering Time:	February to May	
Height:	1-3 feet	
Width:	3 feet	
Exposure:	Shade to sun	
Water Req.:	Occasional - once a month or so, depending on temperatures and wind.	
Habitat Value:	Butterfly	

Comments and Maintenance:

Grows naturally under native oaks where they receive light shade and little summer water. Accepts full sun near the coast. They are drought tolerant once established. Deer resistant. Lovely tall flowering heads provide accent.
