Honeysuckle

Lonicera hispidula

Photographer: Darlene LaMont

Plant Type:	Vine	Evergreen
Flower Color:	Pink	
Flowering Time:	April to July	
Height:	vine feet	
Width:	vine feet	
Exposure:	Sun-part shade	
Water Req.:	Occasional - once a month or so, depending on temperatures and wind.	
Habitat Value:	bees, hummingbirds, birds	

Comments and Maintenance:

Small pink flower clusters on the tips of vining branches. In late summer the birds feast on the beautiful red berries. Although drought tolerant this vine appreciates occasional deep summer watering.
