

Ninebark, prostrate form
Physocarpus capitatus 'Tilden Park'

Photographer: Kathi Dowdakin

Plant Type: Shrub-ground cover Deciduous
Flower Color: White
Flowering Time: April to October
Height: 3 feet
Width: 10 feet
Exposure: Sun-part shade
Water Req.: Occasional - once a month or so, depending on temperatures and wind.
Habitat Value: Butterflies, birds

Comments and Maintenance:

About 3 feet tall, spreading widely, making a good ground cover. Deciduous stems sprout beautiful green foliage with white apple blossom-type flowers in late spring. Summer water but will tolerate dryish conditions once established.
