

Red flowering currant

Ribes sanguineum

Photographer: Walter Siegmund 3

Plant Type: Shrub Deciduous
Flower Color: Red
Flowering Time: January to May
Height: 6-8 feet
Width: 6-10 feet
Exposure: Shade
Water Req.: Occasional - once a month or so, depending on temperatures and wind.
Habitat Value: Hummingbirds

Comments and Maintenance:

Host plant for several butterfly species. Birds love the seeds.
Great under oaks.
