

Matilija Poppy
Romneya coulteri

Photographer: Darlene LaMont

Plant Type: Perennial Evergreen
Flower Color: White
Flowering Time: May to August
Height: 10 feet
Width: 12 feet
Exposure: Sun-part shade
Water Req.: Occasional - once a month or so, depending on temperatures and wind.

Habitat Value:

Comments and Maintenance:

This is the gorgeous Fried-egg plant with huge- 6-10" across-flowers that shine with white petals and large yellow centers. It does well in any soil except where drainage is a problem. May be deciduous in colder areas. It will get root rot, if sitting in wet soil. This becomes, after a slow start, a huge plant, traveling by underground stems. so plant it where there is lots of room. In
