Woodland Rose

Rosa gymnocarpa

Photographer: Darlene LaMont

Plant Type:	Shrub	Deciduous
Flower Color:	Pink	
Flowering Time:	April to June	
Height:	4	feet
Width:	3	feet
Exposure:	Shade	
Water Req.:	Occasional - once a month or so, depending on temperatures and wind.	
Habitat Value:	Butterflies, birds	

Comments and Maintenance:

This small shrub for a dry shady area, provides nectar for butterflies and fruits for birds. Deep pink flowers come in spring and summer. 2" single blooms of a deep pink are quite fragrant. Great habitat plant for a hedgerow to attract bees, butterflies and birds.
