

Thimbleberry
Rubus parviflorus

Photographer: Reny Parker

Plant Type:	Shrub	Deciduous
Flower Color:	White	
Flowering Time:	April to August	
Height:	6 feet	02
Width:	6 feet	
Exposure:	Sun-part shade	
Water Req.:	Moderate -every 3-4 weeks or when top 3-4" of soil is dry.	
Habitat Value:	Birds	

Comments and Maintenance:

Large red edible berries in the summer are a highlight of this plant. Single, white blossoms are attractive in the early spring. Large leaves provide contrast with other plants. It does require some water, its natural habitat is along streams in the forest.
