

Snowberry

Symphoricarpos albus var. laevigatus

Photographer: Darlene LaMont

| | | |
|-----------------|--|-----------|
| Plant Type: | Shrub | Deciduous |
| Flower Color: | Pink | |
| Flowering Time: | June to August | |
| Height: | 5 feet | 02 |
| Width: | 4 feet | |
| Exposure: | Shade | |
| Water Req.: | Occasional - once a month or so, depending on temperatures and wind. | |
| Habitat Value: | Hummingbirds | |

Comments and Maintenance:

White berries in winter make this a stand out shrub for the garden. Grows under trees or other shade. Pale pink flowers in late spring to summer. This shrub puts up multiple slim stems creating an open shrub.
