

Inside-out Flower  
*Vancouveria hexandra*

Photographer: Kathi Dowdakin

Plant Type: Perennial      Semi-deciduous  
Flower Color: White  
Flowering Time: April to June  
Height: 1      feet  
Width: 1      feet  
Exposure: Shade  
Water Req.: Occasional - once a month or so, depending on temperatures and wind.

Habitat Value:

Comments and Maintenance:

Great planted as a ground cover under trees. Provides unusual inside out flowers. Delicate apple-green foliage is our version of Epimedium. Dies back in the winter.
