Yellow Heartleaf snapdragon

Keckiella cordifolia 'Sadie'

Photographer Lynnette Bowers

Plant Type:	Perennial	Dies back in winter
Flower Color:	Yellow	
Flowering Time:	June to September	
Height:	3-6 feet	
Width:	3 feet	
Exposure:	Sun-light shade	
Water Req.:	Occasional-monthly or when soil dry down to 8-10"	
Habitat Value:	Hummingbirds	

Comments and Maintenance:

This yellow flower looks like a snapdragon or penstemon flower. However, instead of forming a shrub it will produce braches at the base and then climb on other plants. Great next to non-blooming plants. The tubular flowers attract hummingbirds and many other pollinators. Cut back dead stems in winter to encourage new growth from the base of the plant.
